Howdy:
this is for a friend of mine who doesn't have net access.
Please respond to him, or if push comes to shove e-mail me.

wanted: radiotron designers hand book 4th edition.
must be in very nice shape.

Many think this R-390A/URR is the best all-around receiver ever made. This one is a late model (one of the last production runs), made by EAC. It is big, heavy, uses tubes. Quality look, feel, and performance. 110 or 220 VAC. Even has ovens for oscillator stability.

Upper tuning limit 31.999 MHz

Has 6 IF selectivity filters (0.1, 1, 2, 4, 8 and 16 KHz).

Also 2 audio filter positions (Wide and Narrow).

2 meters (Line Level, Carrier Level).

Total of 17 knobs (Line Meter sw, Line Gain ctl, Ant Trim ctl, AGC sw, Limiter ctl, Audio Response sw, Break-In sw, Bandwidth sw, BFO Pitch ctl, Function sw, BFO sw, Dial Lock ctl, Zero Adj ctl, Local Gain ctl, RF Gain ctl, Megacycle Change ctl, Kilocycle Change ctl)

Rack mount style (no cabinet, but has all covers). 19 in wide, 10.5 high, about 15 deep.

No speaker. No manual (Fair radio sales has manual).

It is unusually clean, near-new appearance. I can furnish photos with SASE - ask.

\$300 plus UPS if shipped.

For all you tube trivia bufs, this year is the 60th anniversary of two of amateur radio's Grand Old Tubes, the 6L6 and the 807. What would we Novices have done without them? :)

In honor of the 60th anniversary of these fine tubes, I propose that we post references to construction articles for the really outstanding Novice-type rigs which used either the 6L6 or 807. I'm off to find the references to my favorite rigs.

BTW, my first Novice rig was a 6AG7 - 807 Johnson Adventurer in 1959. It was GREAT!

Greetings to all,

I just acquired a Drake 2B yesterday at a swapfest. It is in excellent condition, but I do not have a manual for it. Does anyone have a manual or a photocopy they would be willing to sell? As I said, it is in excellent shape, but I'm sure it could stand to be aligned. Also, does anyone know if the preselector has sufficient range to tune down to 1.8 mc., or is there a mod for this that will not impact the preselector range other than possibly taking out 10 meters?

Also, a friend of mine picked up a Hallicrafters S-38 and needs a manual or photocopy for it. He would also like to hear from anyone who can tell him more about this receiver. By the way, it is the original S-38, not one of the later S-38x models. His e-mail address is mcdonald@tivoli.com, or you can e-mail me and I will forward it to him.

Thanks for any assistance you can provide.

73,
Jeff Kilgore, KC1MK
